Roads Mapping Engineering

QGIS (Quantum Geographic Information System) is a free, open-source mapping and analysis software used to create, edit, visualize, and analyze geospatial (map-based) data.

- Roads Mapping Engineering” is an important part of Civil and Transportation Engineering that focuses on designing, mapping, constructing, and maintaining road networks. It combines surveying, geomatics, GIS (Geographic Information , Systems)and transportation planning.

Data Extraction and Digitization

- Utilize QGIS t o extract and digitize road features (e.g.,road signs,traffic-signals,Lanemarkings, etc.)from Lidar data, aerial imagery and other relevant sources.
- Work with other team members and potentially with external stakeholders to ensure the RFDB meets the required standards and specifications.
- Responsibilities include collecting, analyzing.
- Interpreting geographic data, developing digital maps.
- And contributing t o decision-making processes.

PROJECT

Bearing Grease Analysis (NLC India Limited, Neyveli)

Bearinag Grease AnalysisBearing grease analysis i s the process of testing and evaluating the condition and performance o f grease used in bearings. This i s essential for predictive maintenance,improving equipment reliability, and extending the life of machinery

- Ball bearings ,Roller bearings ,tapered roller bearings ,Needle bearings,Thrust bearings
